ALUMINUM FOIL SERIES

POP-UP FOIL

- 1.The new favorite of food packaging industry. Use aluminum foil as easily as you draw paper. A light pumping can save the time of cutting and the space of the worktable.
- 2.It can be used for printing LOGO, pattern or special embossing of aluminum foil paper. Establish brand recognition in the market faster and better.
3. Embossing can not only increase the beauty, but also increase the friction of the aluminum foil surface, so that users can better grasp the aluminum foil to extract paper, and it is not easy to slip.
- 4.Any size can be customized.

HOUSEHOLD FOIL

- 1.Cook and Store Food with aluminum Foil.
- 2.Suitable for roasting, wrapping, storing and freezing food items.
- 3.Ensures that food is cooked more evenly while retaining moisture and flavours.
- 4.Keeps food fresh for longer, and helps prevent cross contamination.
- 5.Sold as an individual roll.

HAIR DRESSING FOIL

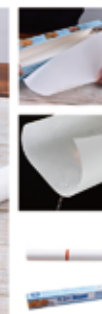

The production technique of hairdressing foil rolls includes coloring, embossing and printing, etc.Hairdressing foil rolls are available in thickness, width and length, and we accept custom requirements such as printing embossing.

CHOCOLATE WRAPPING PAPER

- 1.Square Candy Wrappers are made of food grade safe aluminum foil paper, Non-toxic and odorless, eco-friendly.
- 2.Candy wrappers come in 9 different bright colors of 800 pieces chocolate foil wrappers to help you distinguish differentiate the flavors(golden, silver, purple, red, blue, coffee, pink and green).
3. Embossing can not only increase the beauty, but also increase the friction of the aluminum foil surface, so that users can better grasp the aluminum foil to extract paper, and it is not easy to slip.

SILICONE BAKING PAPER

1. Baking paper- also known as bakery paper or parchment paper, as it is often called especially in the US- is grease proof paper that is used in baking and cooking as it provides a heat-resistant, non-stick surface to bake on.
- 2.Baking paper made of 100% virgin wood pulp. Both sides are processed by food grade silicone, so that it is oilproof,waterproof, non-stick and against high temperature to 230°C.
3. Thanks to these features, our baking paper is widely used for food cooking, baking, steaming, roasting, grilling, freezing and food wrapping.
